Dr. M. SEAN HORNE
Superintendent

October 14, 2020

Russell Family,

During the morning of October 14, 2020, the Russell Independent School District was notified by the Greenup County Health Department that a student at Russell Middle School had tested positive for COVID-19. School Officials are currently working with the Health Department to identify students and staff that may have had direct exposure to the student. Individuals already identified through contact tracing were immediately sent home to await further instruction from the Health Department.

The student who has tested positive for COVID-19 is currently in quarantine and will not return to Face-to-Face Instruction until released by the Greenup County Health Department. Additionally, any students or staff that had direct exposure, as identified by the Health Department, will also quarantine. Any student who has been directed to quarantine will move to Virtual Instruction.

Our Teachers will continue to clean desktops and other highly touched surfaces throughout the school day and our custodial staff will immediately begin a deep clean of Russell Middle School.

Please direct any questions regarding COVID-19 to the Greenup County Health Department at 473-9838.

Sincerely,

Dr. M. Sean Horne
Superintendent
